

PREPARING OUR CITIES FOR CLIMATE CHALLENGES AND IMPROVING THE QUALITY OF LIFE

3rd November 2021 10:00h CET - Online

The world is suffering the ravages of climate change. The adaptation is crucial to mitigate these effects. We are putting solutions in common to avoid or minimize the impacts of the climate, with special attention to cities, to reduce the urban heat island effect.

10:00 Welcome.

Vladimir Gumilar. Director at Construction Cluster of Slovenia.

10:30 Reflective pavements to mitigate Urban Heat Island effect. **LIFE HEATLAND** project.

Francisco Miguel Moral. Head of Energy and Insulation Area, CTCON.

11:00 Monitoring the Urban Heat Island effect. **LIFE ASTI** project.

Stavros Keppas. Research Associate in the Laboratory of Atmosphere, School of Physics, Aristotle Uni of Thessaloniki.

11:30 Improving the resilience of municipalities to climate change. **LIFE URBAN PROOF** project.

Giannis Lemesios. Institute for Environmental Research and Sustainable Development, National Observatory of Athens.

12:00 Closure
